Contact person	Mr. Lam, boss, 9382 7738, Ms Stelli, admin, 9819 9891

2011-09-01 ~ 2013-05-01 @ GEO Application Engineers Pte Ltd

Designation	Software Engineer
Duties	1 Add functions to process raw data from different type of sensors on the work site. 2 Second-hand developing the GeoData website. 3 Develop reporting program and generating reports 4 Monitor real-time data
Skills used	.NET WinForm, SQL Server, ASP.NET MVC, GoogleMap API
Achievement	1 Develop Real-time raw data calculating program 2 Develop an Alarming System, to send suspicious data via Email and SMS to LTA and stakeholders. 3 Develop a Data-driven APS.NET web site to display the calculated results by the Real-time calculator. 4 Prepare for reports to LTA.
Reason for leaving	At that time I wanted to join a company which creates software and sells software, so that we have to produce high quality software to meet the requirement of our clients, and we have to have formal software development cycle. But while developing in-house software, we were not so strict to those industrial standards. That was why I left.
Contact person	Ms. Li Chaoxue, admin, 6383 1548

A Brief Self-introduction

  As I've been working in IT industry for over 5 years, I recognized I not only love programming, but also am good at dealing with people. Such as interviewing clients to gather requirements and collect

feedback, creating technical document in an easy understanding and well-formed way, and coordinating among colleagues and clients.

I'm a friendly, optimistic and open-minded person.
